

A4Light Counter Display

The Ad you have to have

Edge Light Panel with LED Power

This is a display panel for service counters or display shelves. Standard size is A4 backlit with a 24-LED edge-lit light guide backing for the graphic transparency.

Standard power option is a contactless wireless WET pack. WET is Wireless Energy Transfer technology utilising electromagnetic transmission through the benchtop or shelf to give a "no wire" look.

Standard carton pack is a complete installation kit of display complete with frame, transmitter with self-adhesive taping and Australian plug pack.

Wired DC powered version can be customised for specific enquiries.

Non-framed version light panels can be customised.
